

ABC Order - Reporting

Reports can be created, scheduled, and shared via **ABC Order - Reporting**, a robust application within ABC Order. This feature is fully customizable with quick access to your frequent reports, recent report results, smart filters and regulatory reports. With three basic report types – Accounts, Products and Purchases – you can fully customize almost any report you can imagine and schedule it to automatically run at the frequency you need.

Report templates

Purchase Details Report

Snapshot of the status of all orders as they move to completion.

Purchase Summary Monthly Report

This report shows product usage over time. You can search by item, product code, or date range.

Drug Reimbursement Report

The Drug Reimbursement Report lists ASP items you have purchased in the date period selected.

Product Catalog

Prescription (Legend) Drug Transaction History.

Price Changes

Current and historical pricing on a product for a specified date range. Set this to run for your quarterly review!

Lowest Price by MBU

The report allows the user to compare products with a common J-Code to find the product with the lowest price based on the medical billing unit.

Build Your Own Report

Accounts Report, Product Report, Purchases Report – all completely customizable

Informational and Regulatory Reports

Additional reporting across a variety of workflows, including:

- **DSCSA Report**
- **CSOS Receipt Audit Report**
- **Manufacturer Backorder Report**
- **Key Shortage Report**

Most loved features

- **Smart Lists**
Create static lists or dynamic queries of accounts or products to use when building a report.
- **Report Templates**
Quick start any report with pre-filled columns and filters.
- **My Reports**
Save your favorite and most used reports for easy access.
